CITY WINDMILLS HOLDINGS PLC. – Manufacturing Agreement for US/Caribbean

City Windmills has signed a manufacturing agreement to manufacture and produce its vertical axis wind turbines in North America through an engineering firm under a newco name City Wind Manufacturing, based initially in Houston, Texas.

City Wind Manufacturing will supply wind turbine products to North America and the Caribbean region. With increasing power outages in the USA and the Caribbean, as well as growing acceptance of wind energy, City Windmills is now able to supply this large market, and will now begin building its sales channels.

Production is anticipated to commence 3Q2018.

Texas sources 14.8% of its electricity from wind energy, with nearby Oklahoma (31.9%) and Kansas (36%) attesting to the growing importance of wind energy for jobs and power supply in the USA.
